## DOTS G. I. Care Centre Fluoroscopy Unit has started functioning

**S**ituated on the third floor of the O.T. Complex, the DOTS G. I. Care Centre provides state-of-the-art services in the field of upper and lower GI Endoscopy/ERCP's and stenting of stenosed bile ducts. This is second such facility at Civil Hospital Karachi, which is providing costly endoscopic procedures totally Free of Cost to the poor patients referred to this centre from all over the city. The expertise and training imparted to the post graduates and members of the faculty is improving the quality of health care provided at Civil Hospital Karachi.

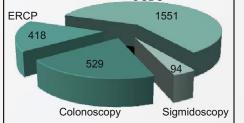

The Centre is fully equipped with regular endoscopes which include two scopes for OGD, two scopes for ERCP, one scope for colonoscopy and one double channel scope with other accessories. The latest addition in this range is a modern fluoroscopy machine.

Fluoroscopy is an imaging technique commonly used to obtain real-time moving images of the internal structures of a patient through the use of a fluoroscope.

### **Opinion** Alumni Projects and Civil Hospital; Time to address basic questions!!!

#### Prof. Shafiq Ur Rehman

Come December; the Old guys & gals and the DESI BOYZ are back to Dow Medical College to walk down the memory lane, and out of gratitude to the Alma Matar every year an Alumni Project is launched.

As the tradition gets cemented; and a project is successfully completed, some questions are beginning to arise which needs to be addressed. The Alumni have poured in and mobilized millions in cash and hard work in critical areas of the hospital which must be accorded official recognition; and a status assigned for its future functioning.

Today the EOT, the Gynae Emergency, the Operation Theatre Complex the upgraded Radiology and ultrasound department, the Central Medical ICU and the Dowites83 Central Lab are all successful Alumni Projects ever since the batch of 76 launched its EOT project back in their silver jubilee year 2001.

The batch of 84 is completing the Elective Gynae Operation Theatre project and the batch of 86 has launched the Neonatal medical ICU. The space for new projects is drying out and we yet hear the batch of 88 is planning a spinal injury centre. While it is heartening and inspiring that the tradition is going on and the Alumni are owning CHK and DMC, the leading stake holders, the DMC and the CHK administration are chilling out. To one, the Alumni interest is uncalled for; and to the other a little nagging. While the main beneficiary remains the poor patients the stake holders think otherwise. I felt a little hurt and surprised when a Alumni batch confided to me that while the CHK administration wants us to repair the broken pavements or fire the Incinerator, the Dow Medical College was diverting them too far away campus.

To the DUHS (which proxies for Dow Medical College) Civil Hospital Karachi is Sindh Government concern. The clinical work of its faculty members rests on their will and conscience. There is no clinical monitoring or audit of faculty members, no concept of ACR for junior faculty members. As a result, a good worker is the one who is only complaint and chauvinistic. The training ground of CHK is used for various paid university programs and the hospital and its patients remain at the giving end.

May be it is time; the university contributes

to the uplifting of CHK or at least takes care of the teachers and faculty members financially, so that their interest in the hospital working remains focused. Sarcastically residents in some wards are drawing more salary than some faculty members. The Sindh Govt. Health Department must also realize that the services rendered by the faculty member to the patients of the CHK also have to be measured financially. The fine facilities developed by the Alumni can only be utilized if the faculty members are adequately compensated and rewarded. Even the finest army does not march on empty stomach.

### Digital Radiology Project of Dowites 85 Dr. Humaira Muin

The successive graduating classes from the batch of 1976 of Dow Medical College have conceived, planned and implemented upgrading ventures for the hospital infrastructure.

The Dowites85 have undertaken to digitalize the Radiology Department of CHK at the total cost of Rs. 30 million approx. out of which the batch has already invested around Rs. 10 million by installing DRD converters to three X-rays machines and two brand new X-ray machines in the same. Desired X-rays exposures are preserved and images taken out by printers. Annually 200,000 patients are expected to benefit from this facility.

View of the new equipment

Digital x-ray images are vastly superior resulting in early diagnoses and treatment of diseases such as cancer and TB, etc. which were previously missed by the physician due to the poor quality of X-Ray image.

Digitalized films have overruled any chances of pilferage or technical lose of conventional X-Ray films which will save million of rupees per annum. Instead of hit and miss technique, now real time desired images can be saved.

Recent contribution from a Dow85 has helped the batch in constructing a state-ofthe-art Auditorium and expansion of new office blocks at the Radiology department which will create more space for three more u/s rooms. This generosity has motivated few more donors towards the project.

Inshallah the x-ray images will be available on-line in real time throughout the hospital.

Under construction auditorium & office block

This will not only help saving precious time in emergency cases; the images saved in the archives and database will also be used for teaching students and will provide the basis for research.

Working on upgraded equipment in X-Ray department

It is hoped that a state of the art Radiology department; equipped with latest machines; operated by qualified radiologists and technicians with latest diagnostic techniques and technologies would provide free of charge quality service to the common person.

## Medical Intensive Care Unit Civil Hospital Karachi

Dr. Hamid Manzoor

The Medical Intensive Care Unit, CHK is a project of Dow Medical College graduates of the year 1982 (DOWITES 82). This project has been developed by the alumni of Dow Medical College on the occasion of Silver Jubilee Anniversary of their graduation.

Life saving Medical ICU-The well needed unit

Civil Hospital Karachi is one of the largest teaching hospital of the country attached to Dow Medical College. The department of Medicine has five units and several allied departments such as Cardiology, Neurology, Psychiatry and Dermatology etc. This faculty has 450 beds altogether. Before the inauguration of Medical ICU, there was no centralized ICU where focused intensive care, including ventilation could be given to the seriously ill medical patients. The cost of such service in private sector is around 20,000 rupees a day which is very much beyond the reach of even the most affluent. The provision of the service is essential requirement in any large public sector hospital.

This sixteen bedded facility has twelve ventilated beds and four beds for high dependency unit. There are two beds reserved for communicable diseases. All beds have central oxygen and suction and have central monitors.

The unit has been developed at the cost of Rs 50 million, ten million of which have been raised by Dowites82, both in Pakistan and in the USA and UK. The Government of Sindh has funded the remaining cost of equipments of around Rs. 40 million.

The unit has been designated teaching unit by Dow University of Health Sciences. The faculty positions including that of a Professor and two Assistant Professors have been approved by Dow University Syndicate. The unit is headed by Prof. Abu Talib, supplemented by Dr. Adil Faraz, Assistant Professor, Medical Critical Care.

The Medical ICU was inaugurated on 21st of February, 2011. Sindh Health Minister, Dr Sagheer Ahmed was the Chief Guest on this occasion. He appreciated the efforts of Dowites in establishing the Medical ICU and assured his continuous support for the ICU. Vice Chancellor DUHS, Prof Masood Hameed Khan, Medical Superintendent CHK, Prof. M. Saeed Quraishy, Dean Faculty of Medicine, Prof Salahuddin Afsar and Head of Medical Department Prof. Khalid Mahmood also spoke on this occasion. Earlier Prof Junaid Ashraf, Principal Dow Medical College and a Dowite82 gave introduction of the project of Medical ICU and Dr Adil Faraz, spoke about the future plans for ICU.

A patient receiving ventilator care

Since its opening, about 1000 patients have been admitted in the Medical ICU, most of whom required Ventilator support as well.

We hope this facility will develop into a teaching ward for undergraduates and post graduates training in critical care.

# First Case of Surgical Fat Graft at CHK

Prof. Mohammad Ashraf Ganatra

19 years old girl presented to the department of Plastic Surgery on 17.05.11 with progressive loss of fat on both sides of her face. The disease process started at the age of 13 years and steadily involved the whole face. The progressive nature of the disease subjected the patient to psychological stress, impairment of performance in her education and social interaction. After required examinations, we planned to operate upon the patient.

Micro or structural fat grafting, involves harvesting of microscopic fat cells, process of harvested fat cells and finally their transfer to the recipient sites. The beauty of this surgical procedure is that the volume is replaced up to the desired level with no scars on the recipient sites - the face in this particular case. After counseling and consent, the patient was operated on 26.05.11 by my team and I, at OT Complex. Natural process of postoperative facial edema subsides in few weeks and the end result has more beautiful outcome than what is being shown here.

This surgical procedure has been performed for the first time in any public sector hospital in Sindh, the obvious

Changing the life of this girl

unavailability of required instruments and Load of other patients population having functional problems like post burn deformities, cleft lip and palate, Hypospadias, congenital hand problems and malignancy among others.

The department of Plastic Surgery looks forward to address such patients' problems in future as we think cosmetic problems need same attention as functional problems!

# **Advanced Laparoscopic Colorectal Workshop**

Prof. Amjad Siraj Memon

Civil Hospital Karachi being the largest tertiary care hospital of the province has a strong surgical department under the chairmanship of Prof. Saeed Quraishy.

In recent time, specialties and subspecialties have become established all over the world. In this regard, I have endeavored to take up colorectal surgery as I have a special interest in it. Keeping in view the advancements in laparoscopic management of diseases, a team of expert from Vietnam was invited to conduct a workshop on advanced laparoscopic colorectal surgery on April 29 & 30 2011.

The procedures performed by Dr. Nguyen Bac with our team members were lap Rt.

Surgical faculty

#### surgical procedures, live comments were taken by the surgeons from the audience in the auditorium of DOTS OT Complex.

The Workshop was attended by a large number of participants from all parts of Pakistan and was a huge success. The workshop was sponsored mainly by Johnson & Johnson Endo-surgery and suture division. Messer Boshe Pharma was also of great help in looking after the guests. The program concluded with the address of the Vice Chancellor of Dow University of Health Sciences Prof. Masood Hameed Khan, who also distributed certificates and souvenirs among the guests and the organizers. The program ended with a vote of thanks by the coordinator.

The DOTS OT Complex staff proved their metal by arranging every detail of the level of perfection.

VC honoring Dr. Nguyen Bac

### Condolence

Prof. Saleem Kharal, husband of Dr. Yasmeen Kharal AMS OT'S CHK. was murdered while on the way to attend a wedding party on Friday 30.12.11. The ex-director of

JPMC and a Microbiologist by profession, Prof. Kharal was working as the Head of, Department of Pathology, JPMC. His sudden death has not only traumatized his survived wife and two sons; it has also shocked the whole fraternity on this national loss.

We all stand beside the grieved family at this grave tragedy and pray for their swift emotional recovery. May Allah rest the departed soul in peace.

### Case Report Dr. Aun Ali & Dr. Summaiya Saeed

45 year old Partab, resident of Kashmor, had Carcinoma of the Caecum. His

diagnosis was delayed because every body focused on his anemia and did not look for the cause. In Civil Hospital, Karachi, department of Surgery, he was admitted and worked up for definitive diagnosis, which was a tumor in caecum that was diagnosed by the state of art Colonoscopy

section of GI Unit run by DOTS. He was offered a state of the art surgical facility backed up with latest technicology equipments like Surgical Staplers and

Tumor in caecum

Dowite OT complex provides free of cost surgeries to poor patients coming from far fetched areas of different parts of the country.

Scalpel, which made this difficult surgery of an advanced disease, easy and with minimal blood loss, a Right Hemicolectomy was performed.

Patient recovered and is now leading a normal healthy life.

> Equipments like Ligasure, Surgical Staplers and Harmonic Scalpel are not available in every theater; their presence in Dowites 78 OT complex has really made difficult surgical procedures possible

with favorable outcome

and conservation of

time and blood loss.

# An Interview with Prof. Naheed Sultan

In an interview with the editorial board of the newsletter, Prof. Naheed Sultan shared her viewpoints and experiences on diverse issues concerning the

surgical faculty and allied along with her judgments and suggestions for the improvement of the working and functioning of the OT Complex.

Q. How do you think the OT Complex is justifying its role in skill development of the faculty?

A. The OT Complex has brought a positive change in the quality of surgery and surgical outcome while compared with the recent past. I being the Dean of faculty am proud of this facility. The sterilization and ancillary

facilities including availability of water, all round power supply, air-conditioning has indeed made life easy for the surgeons in field. The management of data in customized software has made the desired report available on a click which is a ready tool for surgical audit. The latest machinery and technology availed through the Govt. of Sindh or DOTS helps our paramedical staff and OT technicians to enhance their surgical skills. Organizing international surgical workshops motivates our faculty and technicians to learn the latest skills and get excellence on techniques.

#### Fluoroscopy Unit... Continued from page 1

In its simplest form, a fluoroscope consists of an X-ray source and fluorescent screen between which a patient is placed. Today, The modern fluoroscopes couple the Screen to an X-ray image intensifier and be recorded and played on a monitor. I call the OT Complex a success story as an alumni project. The government should also continue to cooperate and the public should be made aware of the remarkable service provided to this public sector hospital.

Prof. Naheed Sultan, a Dow graduate of '79 is the first female FCPS surgeon in the field of General Surgery. She joined the health department in the year 1982 and became Professor of surgery in the year 1999. She is the HOD of SU I and Dean of the faculty of Surgery and Allied.

Today when female medical graduates are outnumbering their male counterparts, Prof. Naheed Sultan as a surgeon, serves as a role model for young lady doctors to take up the challenging fields of General Surgery.

Q. How can this surgical facility be best utilized coupled with the surgical faculty to its optimum?

A. In purview of the number of surgical admissions which could have been many times enhanced in the possibility of a number of increases in surgical capacity; I can speak out a solution that is in my mind for a long time. In public sector hospitals, the elective surgeries are performed in the morning with time constraint, therefore this surgical facility can not be used beyond 3:00 p.m. at times much less. A better coordination between the units operating in the theatre can accommodate each others surgical list instead of postponing the patients due to lack of time. The Administration of OT Complex can intervene and play a very positive role utilizing the allotted surgical hours to its optimum.

Monitoring the efficiency of faculty, frequent follow up of surgical outcome in terms of quality and quantity is essential. The system of ACR was better but now the proper use of surgical audit can also be an effective tool

#### for this purpose.

Q. As the Dean of Surgery are you satisfied with the teaching and training of junior surgeons?

A. The teaching and training can only improve if there is accountability. To raise the standard of the skill of junior consultants, they need to have more exposure and knowledge of their job to keep themselves abreast with the latest trends and techniques. This can only be done by taking out time for workshops and live surgical conferences which we organize time and again for their training. The junior surgeons too, should restrain private practice for the sake of professional expertise. However the role of supervisors has been made more responsible and improved immensely. Today, seniors monitor emergencies. I have plans to meet all the HOD's in this regard. To improve further, data collection is important

for evidence based accountability.

Q. How does it feel to be a female surgeon as the Dean of surgery and Allied?

A. Actually gender has never been an issue in medical science; however there is an acute shortage of female general surgeons. The ratio of female to male surgeons in this metropolitan city of Karachi is 4 : 30, what one can say about the rest of the country. I have been trying to motivate young female graduates to join general surgery, since the results are quick and delightful besides being rewarding when compared to the routine mundane of other medical fields.

Surgical and Medical faculty is providing its services to the centre and young doctors are also being trained and acquiring skills in this field of medical science.

We thank Civil Hospital Karachi for providing this fluoroscopy machine for the DOTS G. I. Care Centre and hope that the administration will continue to support this facility.

A series of workshop on "Skilled Birth Attendance for Healthy Mother and Newborn" was organized by MedInBytes on 20.01.2011 aiming at providing the basic essential training that is required to facilitate the standard intrapartum care with management

School of Nursing, CHK were trained in the groups of four. Pakistan Islamic Medical association, Karachi organized a CME having the topic "Update on Surgical Oncology" on Wednesday 20.07.11. The session was chaired by Prof. M. Saeed Quraishy and cochaired by Prof. Shams Nadeem Aalam. Renowned surgeons from major academic

of PPH (the major

cause of maternal

death in Pakistan)

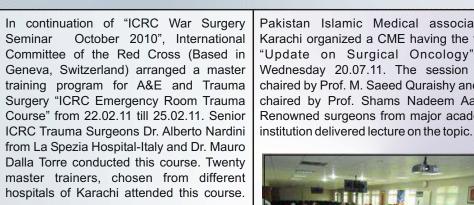

along with the

counseling on

newborn care. 80, 2nd

year nursing students

and midwives from the

The interactive lectures with live demonstration of emergency surgical maneuvers gave the participants chance to

practice newly learned skill under the able supervision of trainers. It is hoped that CHK administration will continue to conduct more of such courses in future.

A seven-day clinical session & TOACS course in Obstetrics & Gynaecology for IMM, MCPS, DGO & FCPS candidates was organized by Department of Obs. & Gynae unit I from 15.12.11 till 21.12.11 at the Auditorium.

The "World Hypertension Day" was celebrated by Department of Cardiology-DUHS/CHK on 17.05.2011. A public awareness programme of hypertension, its consequences and management was organized on this occasion. A large number of patients were also examined in the medical camp set up outside the Auditorium of the Complex.

Trainers at work. A daily class of trainee technicians under Shaheed Benazir Bhutto Program and CHK training program for technicians is scheduled from 9-10 a.m.

A Pre Congress workshop on Paediatric Ophthalmology was conducted by Prof. M. Idrees Adhi on Friday 11.02.2011. The workshop addressed the topic of Management of Retinoblastome, ROP burden & clinical assessment and Paediatric Angiography.

A hands on workshop for routine wiping, disinfection, cleansing of medical devices; like operation table, bed frames, theatre instruments, surfaces and floors in all functional areas of hospital was conducted by the trainer from Intra Health on 7th Jan. 2011. The workshop was attended by the staff members of O.T. Comlex.

#### **Patients Advocate**

#### Maria Shoaib- 4th year, DMC (DUHS)

DOTS, PWA, PPAS, KHADIM E INSANIYAT and the list goes on. All these good people and NGO's are trying to plug the resource gap and improve therapeutic care. A new student organizations 'SOCH' is trying to clean the hospital but none can intervene for patients sake or help the patient before the treatment starts. Plainly 'SPEAK FOR THE PATIENT'...

The other day we saw a patient in Gynae OPD with suppurative, painful, mastitis with high grade fever, she was referred to the Surgical OPD. Two hours later we saw the attendants near casualty(ER); reason, "low blood pressure" they tell us.. SEPTICAEMIA??.. it was 02:00 pm and the patient and her attendants were still in the ER till 4pm . I also recall an old man with gangrene foot supported by his hypertensive sweating wife shuttling from emergency department to orthopaedics and Medical OPD. We saw them the whole week..

HEAVENS!! whats happening?? It is always the CHICKEN or the EGG first story. Is'nt it time to standup and tell the administration to sort out this ' thaanaa' problem. May be the patients need Advocates.. How about Patient Advocate Group for Legal Assistance or may be the hospital administration appoint a senior doctor to be the "Patients' Advocate" ... Dowites are we ready?..

### A case of Tertiary Care- at its best

#### Zainab Khalid Zaki Final year, DMC (DUHS).

34 year old, unmarried, Bilquis Bibi from Saeedabad, KPK developed pain in lower abdomen four months ago. Initially associating it with food intake she gradually lost appetite and then missed her period. The pain became continuous and intense; radiating to legs. She got temporary relieved through some analgesic injection by a local doctor but her amenorrhea started to bother her until she was brought to CHK OBSGY Emergency Room on 23rd March, 2011 with pain in the abdomen.

She was admitted in Gynae Unit III; diagnosed to have a fibroid uterus with ovarian mass in left and a cyst in right ovary. She underwent a surgery on 28th March during which the chocolate cyst in right ovary ruptured. The cyst was removed and fluid was drained. The hard mass on the right ovary, with a size of tennis ball was also removed and sent for biopsy. Small metastatic deposits were also found on gut and omentum. Uterus was small in size and its left side was adherent to the bowel. Trans-abdominal hysterectomy was performed and uterus was removed.

The misery of pain and uncertainty had ended by that surgery. If Bilquis Bibi had not come to a tertiary hospital like CHK, her condition would have worsened. Early diagnosis has a profound effect on prognosis of patients like her. Earlier, the procedure and consequences were explained to her and she consented. She is happy with the progress. Soon, she would be discharged and would only have to visit OPD for next two years.

*Mr.* Anwar Maqsood; a volunteer auctioneer for "Art for Health 2009" is conducting the auction of a necklace by *Mr.* Amin Gulgee.

The event helped DOTS to raise Rs. 5.6 million approx., which shared the cost borne on around 44000 surgical and diagnostic procedures of poor and needy patients performed till the end of year 2011.

Dowites78 Operation Theatre Welfare Society is organizing Art for Health 2012 - an exhibitioncum-auction of more than 130 pieces of Art work donated to the society by renowned artists of the country. The event is scheduled for March 2012; however the paintings by late Sadegein, late Gulgee, Tasadduq Sohail, Ghalib Bagar, Abdul Hayee, Late Mansoor Aye, Tabinda Chinoy, Riaz Rafi, Mona Nagsh, Athar Jamal and many more are exhibited at the Auditorium of the Complex from February 2012.

The Society pays its heartiest thanks to all the artists who donated their priceless work for the promotion of our noble cause and requests the philanthropists and all its well wishers to support this event by bidding generously as the proceeds are utilized for supporting Free of Cost Surgeries of poor and needy patients of Civil Hospital Karachi.
